

At what point did we go from pharmacies that were convenient to convenience stores that had pharmacies?

At Apothecary by Design, we're focused on your health, not on selling flip-flops and motor oil. We're a pharmacy first, with retail prescription and compounding services, specialty disease management, and nutritional health and well-being products. And our pharmacy technology is state-of-the-art, coordinating care between you, your doctor and the pharmacist. A pharmacy designed solely around your health? How convenient.
